## Capabilities

- ✓ Advanced digital process modeling
- ✓ Dynamic resources and assets optimization and simulation
- ✓ GenAI powered intelligent decision support

## Use cases

Dynamic workforce optimization in *retail, healthcare, hospitality, and warehouse*

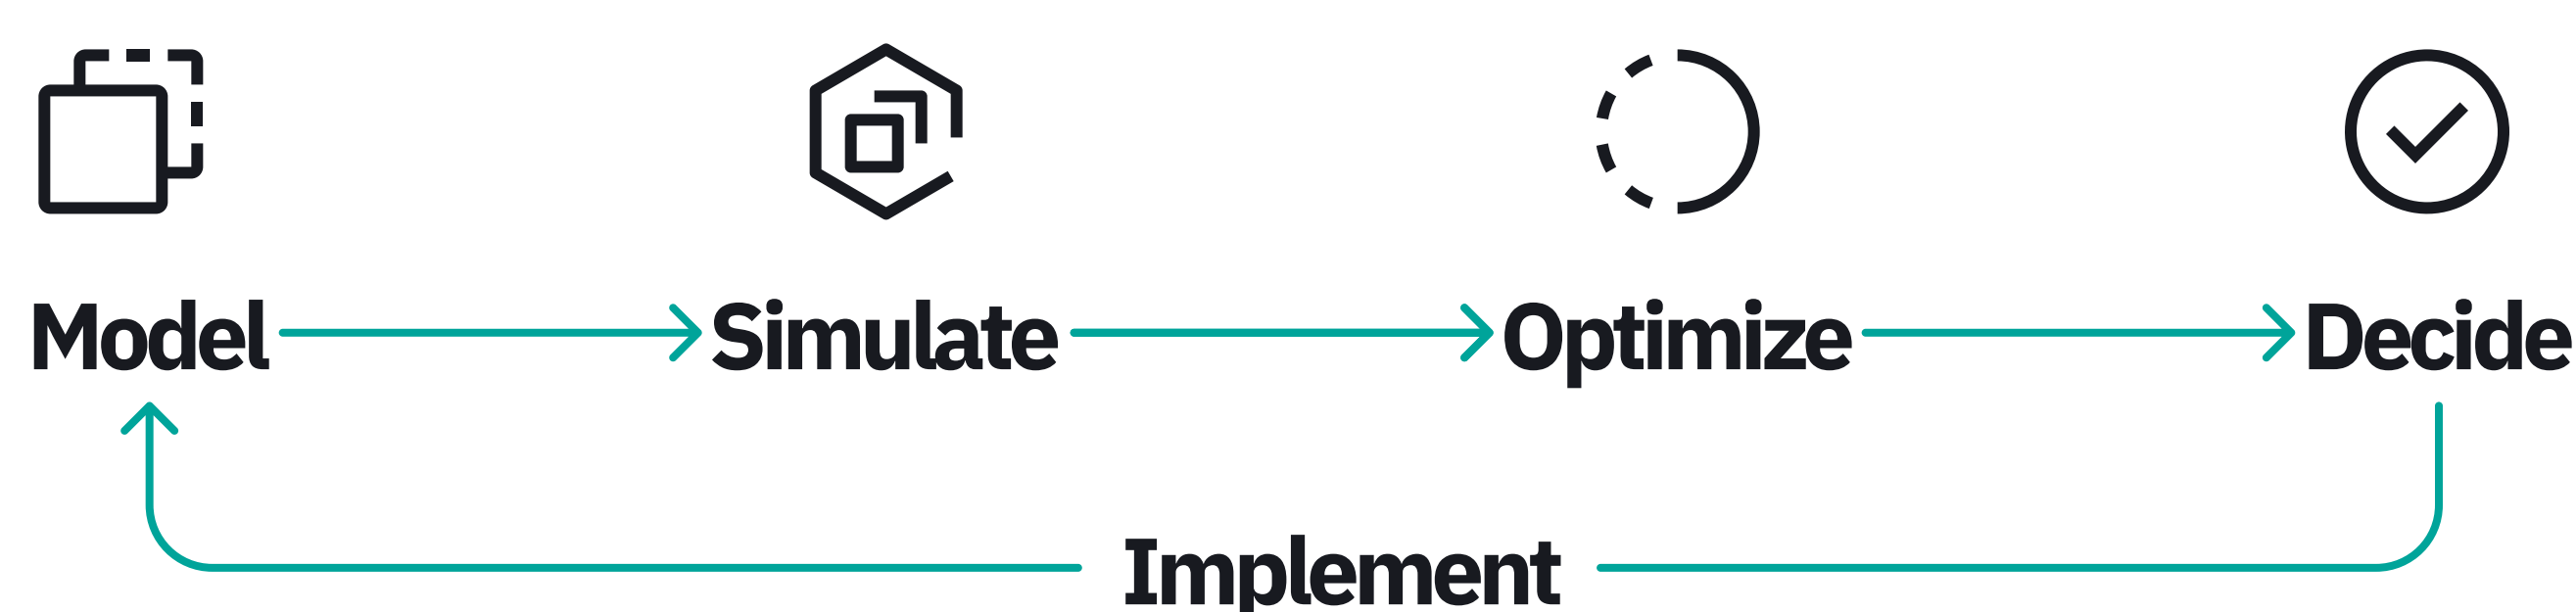

Optimal order allocation and resource management for flexible *manufacturing*

Adaptive capacity management for *customer support centers*

10x faster  
5x preciser  
2x less risks\*

\* Post-digital twin deployment, optimization decisions are instantaneous, offering accurate estimation in impact and uncovering previously unidentified risks

Digital twin platform solutions roadmap

- ✓ Rapid proof of value (2-4 weeks)
- ✓ Digital twin operationalized (2-4 weeks)
- ✓ Start value realized (4 weeks)
- ✓ Scale capability for other use-cases
